Technical Committee Chairman, infO(1) Cup **2017 and 2018**
- Implemented extensive functionality to core software used in the event
- Administered a network of Linux servers used to host and facilitate the event

Romanian Master of Informatics and infO(1) Cup are international, IOI-style algorithmic contests for high-school students. Participating countries include the Russian Federation, Switzerland, Italy, Bulgaria, Serbia, etc.

awards
- Google Code-In 2016, Finalist
- NASA Ames Space Settlement Contest 2016, 2015, Second Prize and First Prize respectively as part of team Zora, acting as Research and Communications Officer

projects

Academic Projects
- Designed and implemented an Instagram-like photo sharing application for Android using Firebase and the Android SDK

skills

Programming Languages
- Confident with **Java** and **Python**, have experience with **C**, **C++**, **Haskell** and **Perl**
- Confident with common markup languages such as **HTML**, **CSS**, **LaTeX**, etc.
- Able to learn new languages and technologies rapidly and effectively, in order to adapt to new requirements

Technical Skills
- **Software Development** — Able to write high-quality code, using appropriate languages, libraries, frameworks and algorithms and debug, maintain and build upon existing code
- **Linux** — Confident in using the command line, scripting, using traditional development tools such as Git and administering small to medium sized networks of servers

other
- Attended the **International Space Development Conference** 2015 and 2016 (Toronto, CA and San Juan, PR respectively)
- Took HSCS1004 **Introduction to Philosophy** course in Autumn 2018 at Imperial College London

Languages
- Native **Romanian**
- Fluent **English** (CAE C2)
- Limited **German** and **French**
